

BOOK WISH LIST

Board books are our greatest need. A board book has pages that are made from heavy cardboard. These are prescribed to children ages 6 months-2 years. Single books or box sets are greatly appreciated.

Preschool books are also very helpful. Preschool books usually have a hard cover but the pages are made of regular paper. They are not a chapter book. These are prescribed to children ages 3-5 years. Single books or box sets are greatly appreciated.

Culturally Diverse and Inclusive books that reflect the patients we serve are always needed. These allow for children to identify with the characters as they can better see themselves in the books.
